28 December 1945.

Kit, Dental, Small, Field, Substitute

SOURCE: Tokyo, Japan.

IMPORTANCE: Not previously reported.

DESCRIPTION: This set is contained in a rectangular stainless steel case, 6" x 2 1/2" x 1", with a chamois cover. The Japanese characters on the item are translated as "Dental Instruments." The metal case is hinged with a metal clasp lock on the front. The case contains a metal rack into which the instruments fit compactly.

The contents of the case from front to rear (see Fig. 2) are as follows:

- | | | |
|--|----|---|
| 1. Drill, straight, hand operated, 5 3/4" | ea | 1 |
| 2. Hand piece, angle, for drill, 3" | ea | 1 |
| 3. Forceps, Dental, angle, sharp, 6" | ea | 1 |
| 4. Handle, instrument, detachable, for accessories, 4 1/2" | ea | 2 |
| 5. Handle, instrument, root canal, 3 1/2" | ea | 1 |
| 6. Case, metal, with assorted accessories for instrument handles | ea | 1 |
| 7. Case, metal, with assorted dental burrs | ea | 1 |
| 8. Mirror, dental, for instrument handle | ea | 1 |

COMMENTS: This case contains the minimum number of instruments for field dental work with a small number of troops where a foot or motor driven dental drill is not available. It is compact and the instruments of
